

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Project Name

Digital Ledger & Credit-Debit Management System

Version

1.0

Product Overview

The Digital Ledger & Credit-Debit Management System is a business application designed for individuals, shopkeepers, and small businesses to digitally maintain customer accounts, credit/debit records, outstanding balances, and financial reports.

The application replaces traditional paper-based ledgers and provides a secure, organized, and searchable platform for managing financial transactions.

Business Goal

To provide a simple and efficient ledger management solution that helps users:

- Track customer balances
 - Record credit and debit transactions
 - Maintain complete transaction history
 - Generate reports instantly
 - Export reports in PDF and Excel formats
-

Target Users

Primary Users

- Shopkeepers
- Retail Stores
- Small Business Owners
- Freelancers
- Individual Users

Secondary Users

- Account Managers
 - Store Assistants
-

User Roles

Administrator

Can:

- Manage customers
 - Add/Edit/Delete transactions
 - Generate reports
 - Export reports
 - Manage payment modes
-

Functional Requirements

Customer Management Module

Add Customer

User can add:
